Pyin Oo Lwin, Myanmar

EDUCATION

University of Computer Studies (Mandalay)

Final Year (2022-Present)

Relevant Coursework:

- Data Structures and Algorithms
- Database Systems
- Software Engineering
- Operating Systems

SKILLS

- Programming Languages
 - C++, Java, C#, JavaScript, PHP, SQL
- Frontend
 - HTML, CSS, Bootstrap, React.js, jQuery
- Backend
 - Spring Boot, Laravel
- Database
 - MySQL, SQLite
- Tools & Technologies
 - Git, GitHub, Visual Studio, VS Code

ABOUT ME

Computer Science student with experience in web development, database management, and software engineering projects. Skilled in Java, C#, React, SQL, and Laravel. Strong problem-solving, teamwork, communication, and analytical skills gained through academic and collaborative projects. Passionate about building scalable applications and continuously learning cloud computing, artificial intelligence, and modern software development technologies.

EXPERIENCE

- Volunteering as a frontend developer in The Blossom Organization for 1 year.

PROJECTS

Smart Home Automation Prototype

Technologies: C#, Windows Forms, SQLite, MQTT, ESP32

Role: Frontend & Database Developer (Team Project)

Responsibilities:

- Designed and developed dashboard user interfaces.
- Created database tables and relationships using SQLite.
- Participated in testing and debugging activities.

Restaurant Ordering and Management System

Technologies: Java, Spring Boot, React.js, MySQL, REST API

Role: Full Stack Developer (Team Project)

Responsibilities:

- Developed reservation management functionalities, including current and future reservations.
- Developed kitchen-side order status management.
- Implemented customer order tracking and bill viewing functionalities.
- Designed and implemented business logic for restaurant operations.
- Developed customer and staff authentication modules (Login and Registration).
- Created menu browsing, order list, and order summary interfaces.
- Developed management pages for categories, menu items, restaurant tables, and inventory.
- Implemented Create, Update, and Delete operations for restaurant resources.
- Built responsive user interfaces to improve user experience.

Pizza Ordering System

Technologies: HTML, CSS, JavaScript, Bootstrap, PHP/Laravel, MySQL

Role: Full Stack Developer (Own Project)

Responsibilities:

- Designed and developed the complete system.
- Created responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Developed customer registration, login, and profile management features.
- Built shopping cart and checkout functionality.
- Developed order management features for customers and administrators.
- Designed and implemented the MySQL database structure using XAMPP.
- Developed backend functionalities using Laravel/PHP.
- Performed testing, debugging, and system maintenance.
