EDUCATION

University of Computer Studies (Mandalay)
Final Year (2022–Present)

- Relevant Coursework:
- Data Structures and Algorithms
 - Database Systems
 - Software Engineering
 - Operating Systems

SKILLS

- Programming Languages
 - C++, Java, C#, JavaScript, PHP, SQL
- Frontend
 - HTML, CSS, Bootstrap, React.js, jQuery
- Backend
 - Spring Boot, Laravel
- Database
 - MySQL, SQLite
- Tools & Technologies
 - Git, GitHub, Visual Studio, VS Code

ABOUT ME

Computer Science student with experience in web development, database management, and software engineering projects. Skilled in Java, Spring Boot, C#, React, SQL, and Laravel. Strong problem-solving, teamwork, communication, and analytical skills gained through academic and collaborative projects. Passionate about building scalable applications and continuously learning cloud computing, artificial intelligence, and modern software development technologies.

EXPERIENCE

- Volunteering as a frontend developer in The Blossom Organization for 1 year.

PROJECTS

Smart Home Automation Prototype

Technologies: C#, Windows Forms, SQLite, MQTT, ESP32

Role: Frontend & Database Developer (Team Project)

Responsibilities:

- Designed and developed dashboard user interfaces.
- Created database tables and relationships using SQLite.
- Participated in testing and debugging activities.

Restaurant Ordering and Management System

Technologies: Java, Spring Boot, React.js, MySQL, REST API

Role: Full Stack Developer (Team Project)

Responsibilities:

- Developed reservation management for current and future bookings.
- Implemented kitchen-side order status tracking and customer bill viewing.
- Built authentication modules for customers and staff.
- Developed CRUD operations for categories, menu items, restaurant tables, and inventory.
- Built responsive user interfaces using React and Spring Boot APIs.

Pizza Ordering System

Technologies: HTML, CSS, JavaScript, Bootstrap, PHP/Laravel, MySQL

Role: Full Stack Developer (Own Project)

Responsibilities:

- Designed and developed the complete system.
- Implemented user authentication, profile management, and shopping cart features.
- Built order management functionalities for customers and administrators.
- Designed responsive interfaces and integrated backend services.
- Performed testing, debugging, and system maintenance.
